Treatment Capabilities

Severe Bleeding

Unconsciousness

CPR

Rescue Breathing
Children & Infants

AED
Application

Trouble
Breathing

Opiate
Overdoses

Hypothermia

Seizures

Choking

mobilize **NOW** | Bystanders Save Lives

Medical emergencies happen every day. A shooting at a baseball park, a car accident on a highway, or an allergic reaction at home – all of these scenarios could result in fatalities if someone at the scene doesn't know how to help.

By hosting a two-hour MobilizeNOW event, you can empower bystanders to become immediate responders with the Mobilize Rescue System. After the course, participants will be fully prepared to manage:

- Severe bleeding
- Chest Trauma
- Airway Issues (Choking, Seizures, Opiate Overdoses, Unconsciousness)
- Cardiac Arrest (Adult, Child, & Infant CPR)

We will work with you to develop a custom training program or event to meet your organization's specific needs.

Contact us at NOW@mobilizeRescue.com for more information.
